

MASK SAFETY PRINTABLES

These are printables to make sure that our recipients are safe when wearing masks that are made by our volunteer team or others! These printables are inclusive to those with limited resources, so these are keeping our vulnerable populations without water access or with limited sanitizing agents in mind!

MASK SAFETY INFO

Always sanitize your mask appropriately before putting on, after removing and if accidentally touching the outside. Remove only by the ears.

Sewn masks don't offer the same protection as medical grade, but do help. It's **important** to still socially distance even while wearing your mask. A mask does not replace socially distancing.

Your mask should cover your nose and mouth, not have gaps, and fit snugly. Try on the mask before wearing in public so you can get a perfect seal to limit touching while wearing in public.
